

Official websites use .gov A .gov website belongs to an official government organization in the United States. Secure .gov websites use HTTPS A lock () or https:// means you've safely connected to the .gov website. Share sensitive information only on official, secure websites. Photo by Getty Images PPE is the last line of defense and least effective method of control against a hazard and does NOT take the place of engineering or administrative controls. Effective use of PPE relies on the user and is only used until better controls can be identified and implemented. Selection of PPE depends on the potential risk of exposure to a hazard. Examples of PPE by body areas include:
